Art Unit: 2822

This Office Action is in response to the papers filed on February 24, 2004.

The specification is objected to because the patent application cited on page 1, lines 22-23, must be identified by its Serial Number, filing date, and Patent Number (if any).

The specification is also objected to because "window 102" (page 5, line 6) should read "the window" (see page 5, lines 4-6).

The specification is also objected to because "silicon oxide layer 105" (page 5, line 17) should read, "P-type silicon layer 105" (see page 5, lines 12-13).

Independent claim 1 is objected to because "an N-type doped polysilicon layer" (penultimate line) should read, "a P-type doped polysilicon layer" (see the specification at page 5, lines 12-13).

Claims 2 and 3 depend on independent claim 1 and are thus similarly objected to.

Claims 10-26 are allowable over the prior art of record.

The prior art of record does not disclose or suggest the claimed bipolar transistors taken as a whole, including the opening.

United States Patent 5,512,785, United States Patent 6,156,616 and United States Patent Application Publication 2004/0164378 are relevant to this application.

This application is apparently in condition for allowance except for the above formal matters.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.
